AUTHOR	McLemore, Bob, Comp.; And Others
TITLE	Statistics Concerning Indian Education, Fiscal Year 1977.
INSTITUTION	Bureau of Indian Affairs (Dept. of Interior), Washington, D.C. Office of Education Programs.
PUB DATE	81
NOTE	40p.; For related documents, see ED 141 045-047 and RC 012 726-727.
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	*Agency Role; *American Indian Education; American Indians; Average Daily Membership; *Boarding Schools; Census Figures; *Day Schools; Dormitories; *Elementary Secondary Education; *Enrollment; Federal Legislation; Federal Programs; Graduates; Higher Education; School Construction; Schools; Tribes
IDENTIFIERS	*Bureau of Indian Affairs; Contract Schools; Johnson O Malley Act

ABSTRACT

The publication contains tabular statistical data on Bureau of Indian Affairs (BIA) operated schools during 1977: (1) numbers of Indian children ages 5-18 and over 18 enrolled in school by area, agency, and school status; (2) number of schools operated, by type; (3) enrollment and average daily membership by type of school; (4) boarding school enrollment and average daily membership; (5) day school enrollment and average daily membership; (6) dormitory enrollment and average daily membership; (7) school enrollment by grade level and area; (8) school completions and graduates by area; (9) school enrollment by degree of American Indian blood; (10) school construction summary by location; (11) school enrollment by tribe; (12) participation in programs authorized by the Elementary and Secondary Education Act; (13) higher education programs; (14) Johnson O'Malley enrollments by area; (15) enrollments in schools contracted to American Indian groups for operation. A fact sheet is included, indicating that 45,276 Indian students were enrolled in 194 BIA schools with an average daily membership of 40,432.9; that an additional 5,371 atudents were enrolled in contract schools; that high school graduates numbered 1,614; and that post graduate completions and placements numbered 651. EDUCATION OF INDIAN CHILDREN IN 1977

Indian children attend public, tribally-operated, Federal, private, and mission schools. In Fiscal Year 1977 there were 219,212 Indian students, age 5 to 18 years, inclusive, enrolled in these schools in the United States.

In 1977 more than half (68 percent) of all Indian children of school age (5 - 18) attended public schools. Of those enrolled in school, 73 percent attended public schools, 22 percent attended Federal schools, and 5 percent attended mission and other schools.

For more than three centuries, Indian education in the United States was largely under the direction of missionaries. As early as 1568, the Jesuit Fathers organized a school at Havana, Cuba, for Indian children from Florida. This was the first school attended by Indian children who lived within the United States.

Many of the treaties between the United States and Indian tribes provided for the establishment of schools for Indian children. Congress has also provided schools for Indian children where other educational facilities were not available. In 1842, there were 37 Indian schools in operation and by 1881 the number had increased to 106. In 1977 the Bureau of Indian Affairs operated 179 schools with an enrollment of 42,937 Indian children, and 15 dormitories for 2,339 children attending public schools. In addition, 5,371 students were enrolled in tribally-operated schools.

The primary objective of Federal and tribally-operated schools operated for Indian children living on Indian-owned or restricted trust lands is to prepare them for successful living. In these schools, children develop basic academic skills, acquire an understanding of the social and economic world which surrounds them, learn improved standards of living, follow practices which assure optimum health, acquire the necessary vocational training to qualify for gainful employment, and obtain sufficient education to enter special schools and institutions of higher learning. The system of schools provided by the Federal Government for Indian children meets program standards required by the States in which they operate.

A full 4-year high school course was offered at 27 schools. Thirteen other schools offered high school training at less than the 4-year course.

Indian children are entitled to the same opportunities for public school education as are provided for other citizens living within a State. It is encouraging to note that the States have assumed responsibility for the education of 149,326 (68 percent) school-age Indian children in the States where the Bureau of Indian Affairs has direct educational responsibility. Over one-third are educated at no cost to the Bureau of Indian Affairs. In some States, however, tax-exempt, Indian-owned lands and large numbers of Indian children within a school district may create financial burdens for which local funds are inadequate. As early as 1890, contracts providing for financial assistance to schools attended by Indian children were negotiated with individual districts. It was recognized then, as today, that Indian children become better adjusted to living with all people in a community when they associate with other children in public schools. The Johnson-O'Malley Act, which became law in 1934, authorized the Secretary of the Interior to enter into contracts with States for the education of Indians and to permit the use of Federal school buildings and equipment by local school authorities. Consequently, some States with large Indian populations now have no Federal schools within their boundaries.

Under the terms of Public Law 874, 81st Congress (64 Stat. 1100), as amended August 13, 1958, administered by the Department of Health, Education, and Welfare, a new Federal aid resource was made available to eligible school districts educating Indian children. This aid is available to meet partial costs of normal school operation. Additional supplemental aid for the education of Indian children under the Johnson-O'Malley program is limited to districts that do not qualify under the Public Law 874 program and to districts meeting educational problems under extraordinary circumstances, including special services and special programs designed to facilitate the education of Indian children.

In Fiscal Year 1977, the Bureau of Indian Affairs entered into contracts with 7 States, 105 school districts in other States, and with 121 tribal groups in accordance with approved plans which specify conditions under which financial aid is

extended. In addition to these, aid was provided through contracts for the education in public schools of 1,145 out-of-district Indian children living in dormitories operated by the Bureau of Indian Affairs in 7 towns adjacent to the Navajo Reservation.

In summary, then, the Bureau of Indian Affairs had direct responsibility for the 45,276 children, enrolled in Federal schools and housed in Federal dormitories, indirect responsibility for 5,371 attending tribal schools funded by the Bureau of Indian Affairs, and partial financial responsibility for approximately two-thirds of those enrolled in public schools.

Statistics Concerning Indian Education are published annually by the Bureau of Indian Affairs and are available upon request.

Congressional appropriations to the Bureau of Indian Affairs are limited to the education of children of one-fourth or more degree of Indian blood and native children in Alaska, except for the Cherokee Agency where children of less than one-quarter degree of Indian blood enrolled in the tribe may attend Federal schools. Native children in Alaska are Indian, Eskimo, and Aleut. The 15 Tables below relate to Indians and native children, as defined above, and to their schools.

Table 1 shows the enumeration of all Indian children from 5 to 18 years, inclusive, and those over 18 who are enrolled in school by area, agency, and school status.

For Indian children who are enrolled in public schools and are no longer a Federal education responsibility, the Bureau must rely on the public school systems to provide census information. Indian mobility accounts for the children, 5 to 18 years, inclusive, who are shown under the caption "Information Not Available."

Five-year-olds have been included with the school-age population since Fiscal Year 1969 when kindergarten classes were added in some schools operated by the Bureau of Indian Affairs.

It should be noted that children over 18 are not included in the enumeration of school-age population. Table 1 is based on the annual school census of Indian children 5 to 18 years

344-168 O - 81 - 2

old, while Tables 3 through 10 are derived from annual attendance reports of individual schools operated by the Bureau of Indian Affairs and cover all students enrolled regardless of their ages.

Table 2 indicates numbers of schools by area. Table 3 indicates enrollment and average daily attendance in Federal schools by type of school and area. Average daily membership for all schools was 88.6 percent in 1977 as compared to 89.9 percent in 1976.

In Fiscal Year 1977, the Bureau of Indian Affairs operated kindergarten classes in 101 schools (36 boarding schools and 65 day schools) with an enrollment of 2,742 children. All kindergarten pupils attend school on a day basis. The kindergarten enrollment represented 6.4 percent of the total enrollment.

Tables 4, 5, and 6 list individual schools and dormitories operated by the Bureau of Indian Affairs, mailing address, enrollment, average daily membership, and grades taught.

Table 7 indicates grade level. In 1977 enrollment in kindergarten and first four grades decreased 981 pupils to 17,204 as compared to the previous year's 18,185. This group represented 40.1 percent of the entire student body.

In line with the Bureau's policy of encouraging public school enrollment of Indian children, many students transfer to public schools when they reach the sixth grade and have become proficient in the use of the English language. This is a factor in the seemingly low numbers of graduates of Federal high schools. In Fiscal Year 1977, 1,614 high school students graduated, an increase of 214 students from 1976.

Table 8 indicates the number of high school graduates and number of Post High School completions or placements.

Table 9 indicates students according to their degree of Indian blood. Full bloods comprise 76.4 percent of the total and only 6.1 percent are less than one-half Indian blood.

Table 10 shows tribal designation of students in Federal schools. One hundred and nine specific tribes or tribal groups

and Aleuts, Eskimos, and the various tribes of Indians in Alaska were represented in 1977.

Sixty-four tribes had fewer than 39 members each and these are grouped together as "All Other Tribes." Aleuts, Eskimos, Navajos, Sioux, Chippewas, and Pueblos (including Hopi, shown separately) are the most numerous and together comprise 67.9 percent of the total enrollment.

Table 11 indicates the completed school construction, both new and replacement, during Fiscal Year 1977.

In Fiscal Year 1977, the Bureau of Indian Affairs participated for the tenth year in the Elementary and Secondary Education Act. Table 12 indicates the extent of the activities carried out under the various Titles of the program.

Table 13 indicates the number of undergraduate and graduate students who received scholarship grants in Fiscal Year 1977, as well as the number of students earning degrees.

Table 14 shows the number of students enrolled in schools by States, receiving assistance through contracts funded under the Johnson-O'Malley Act which became law in 1934.

Table 15 shows the number of Indian pupils enrolled in schools being operated under contract to Indian groups.
